Unitime Systems Awards Automated Timekeeping for Sales Performance

Boulder, Colorado – June 24, 2003 – Unitime Systems, Inc., a leading provider of automated time and attendance solutions, today announced that Houston based Automated Timekeeping, Inc. was the top-selling business partner for the past year in the Southwest region. Automated Timekeeping received an award at Unitime Systems' annual Business Partner Roundup conference for its performance in sales throughout Texas and the Southwest. Automated Timekeeping was also recognized for exceptional sales of Unitime Systems' Small Business Version, a timekeeping solution designed for companies with 75 or fewer employees. Some of the companies that have recently purchased a Unitime solution from Automated Timekeeping include Dixie Chemical, Houston Association of Realtors, Compressor Engineering, Sam Kane Beef Processing, and Millennium Healthcare.

"Automated Timekeeping is a model business partner organization, both for Unitime Systems as well as the other software solution vendors they represent," said Greg Peterman, Vice President of Channel Sales for Unitime Systems. "We're proud to have such an experienced and caring group of individuals representing our company and products, and we wish them continued success."

"Our association with Unitime has been a rewarding one for our customers as well as our organization," said Gail Eddington, President of Automated Timekeeping. "Unitime's approach to customer service and commitment to product development provides a comforting knowledge that our customers will always receive a state-of-the-art time and attendance system with great customer support."

#

Unitime Systems, Inc. is a leading provider of powerful yet easy-to-use time and attendance systems that interface seamlessly to most popular payroll, human resources, and other essential business systems. Founded in 1993 and headquartered in Boulder, Colorado, Unitime Systems has built a reputation for outstanding customer service and a willingness to integrate with other business systems to create "best of breed" solutions.
